

Production optimised technology for the hollowcore industry

## Description

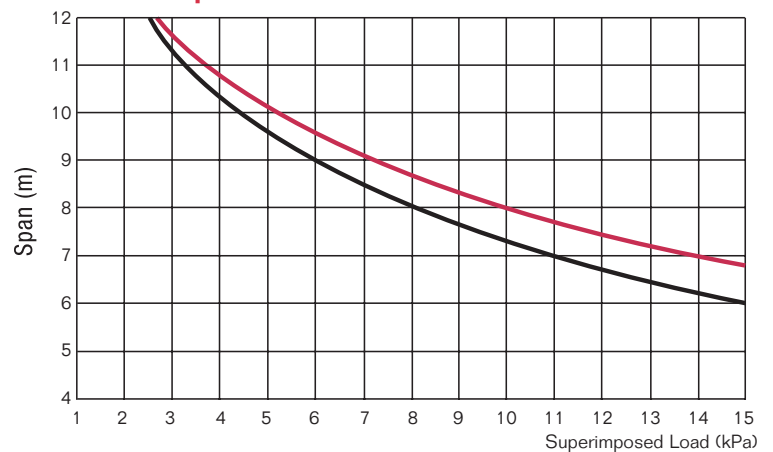

This standard Dynacore 200 serves industry demand for a structurally efficient 200 section that is easy and cost effective to extrude. Produced by our high frequency dynamic compaction extruder technology, the Dynacore 200 is dense and of superior quality.

Additionally, Dynacore Equipment can design and manufacture a custom 200 section to suit the client's needs.

## Section Properties

Weight	$w = 2.4 \text{ kN/m}^2$
Cross-sectional Area	$A = 122 \times 10^3 \text{ mm}^2$
Moment of Inertia	$I = 617 \times 10^6 \text{ mm}^4$
Centroid Height	$y_b = 9 \text{ mm}$
Shear Width	$b_w = 294 \text{ mm}$

## Load/span table

Load/span tables shown are for information only. Actual load/span capabilities will depend on local codes, standards and materials.

- 50 Composite Topping
- Untopped
